## CARE & MAINTENANCE

### UMBRELLA BASE CARE

Do not let dirt build up on the bases. Cleaning with mild soap and water, and seasonal touch-up of any scratches, chips or occasional rust seepage from crevices or hidden, unfinished surfaces inherent in some designs is all that is required. Never leave bases standing in water. To keep your bases looking their best, you may wish to store them when not in use for an extended period of time.

### GENERAL CARE

Proper care and maintenance is required to extend the life of all Furniture Leisure's products. When opening an umbrella, separate each rib at least 4-6 inches from the center pole before attempting to open the umbrella. Do not attempt to force the umbrella open if it does not open properly. Exercise caution during extreme wind and weather conditions and close the umbrellas in winds exceeding 25MPH. Furniture Leisure Umbrellas highly recommends that no umbrella, regardless of size or weight, ever be left unattended in the open position. Please ensure that all Furniture Leisure umbrellas are properly weighted down in an appropriate umbrella base or mount before putting into use. Please contact Furniture Leisure Umbrellas for assistance in choosing the proper weight and size of the appropriate base. In windy conditions, it is further recommended that umbrellas be closed, removed from their base, and stored or laid horizontally. This will reduce the risk of damage to your umbrella, furniture and other belongings on the property. Furniture Leisure's catalog contains some minimum recommendations for necessary weight; but this can vary, depending on the conditions in your particular area.
